

# Almost Finished!

Paving will resume in April between the Broadway and Eisenman interchanges on I-84.

## Watch for details about traffic changes.

The Idaho Transportation Department will return in April to place the top layer of asphalt pavement between the Broadway and Eisenman interchanges. The top layer will strengthen the asphalt and extend the road surface life for 20 years.

## Work will cause the following traffic changes this spring:

- Brief on- and off-ramp closures at the Broadway, Gowen and Eisenman interchanges
- I-84 lane restrictions
- Speed limit reductions

Exact closure dates will depend on weather.

The I-84, Broadway to Eisenman project started last fall and will be complete in Summer 2008. The project is part of the GARVEE Transportation Program. The program uses Grant Anticipation Revenue Vehicle (GARVEE) bonds to construct needed highway improvements in less time than through traditional methods.
